Profile Summary

MCA student at PES University with a strong foundation in Java, Data Structures and Algorithms, and Full-Stack Development. Experienced in developing practical web applications using React, Node.js, Express, and databases. Hands-on experience with REST API development, database management, authentication, and AI integration. Actively strengthening problem-solving skills through Java and LeetCode practice while building real-world applications.

Education

- **Master of Computer Applications (MCA)** 2026 – Present
  PES University, Bengaluru
- **Bachelor of Computer Applications (BCA)** 2023 – 2026
  Seshadripuram College, Tumkur University **CGPA: 9.0/10**
- **Pre-University Course (Commerce)** 2023
  Vidyodaya PU College **Percentage: 95.6%**

Technical Skills

- **Programming:** Java, C++, Python, JavaScript
- **Frontend:** HTML, CSS, React.js, Tailwind CSS, TypeScript
- **Backend:** Node.js, Express.js, REST APIs
- **Database:** PostgreSQL, MongoDB, MySQL, SQLite
- **Tools:** Git, GitHub, Postman, VS Code, Prisma
- **Core Concepts:** OOP, DSA, DBMS

Projects

- **DataMind AI – Conversational AI Data Analyst** 2026
  React, Vite, Tailwind CSS, Node.js, Express, Groq Llama 3.3, DuckDB, SQLite
  - Developed a full-stack AI-powered analytics application that enables users to upload CSV datasets and analyze their data through natural language queries.
  - Integrated Groq Llama 3.3 for conversational analytics and DuckDB for SQL-based calculations, interactive charts, KPI dashboards, and AI-generated insights.
- **Smart AI Attendance System – Face Recognition & Location** 2025
  HTML, CSS, JavaScript, Tailwind CSS, Node.js, Express, MongoDB
  - Developed an AI-based attendance application using face recognition and geolocation to support location-aware student attendance.
  - Built a responsive frontend and backend APIs using Node.js and Express, with MongoDB for managing student records and attendance data.
- **SpeechScribe – Speech-to-Text Web Application** 2026
  React, Node.js, Express, MongoDB, Deepgram AI
  - Developed a full-stack speech-to-text application that converts audio recordings into text using the Deepgram AI API, with audio recording and transcription features.
  - Integrated backend APIs and MongoDB for storing transcriptions; deployed the frontend on Netlify and backend on Render.
- **Shop Management System** 2026
  React, TypeScript, Node.js, Express, PostgreSQL, Prisma, JWT
  - Developed a full-stack application for managing shop operations, including sales, purchases, suppliers, categories, and business reports.
  - Implemented JWT authentication, multi-item sales, Prisma database migrations, and soft-delete functionality with a recycle bin.

Problem Solving

- Actively practising Data Structures and Algorithms using Java, focusing on arrays, strings, hashing, two pointers, sliding window, binary search, and other problem-solving patterns.
- Regularly solving coding problems on LeetCode to strengthen algorithmic thinking, optimize solutions, and prepare for software development interviews. **LeetCode Profile**

Achievements

- Awarded a Merit Scholarship for securing 95.6% in the Class XII PUE Board Examination.
